

# Carding - Art of Banking Frauds

## Overview

Carding is a form of credit card fraud in which a stolen credit card is used to charge prepaid cards. Carding typically involves the holder of the stolen card purchasing store-branded gift cards, which can then be sold to others or used to purchase other goods that can be sold for cash. Credit card thieves who are involved in this type of fraud are called "carders."

## Goals

1. What is bin?
2. What is dumps?
3. Which bins are most vulnerable?
4. Which companies cards are vulnerable?
5. Which companies using 2D gateway?
6. Which companies using 3D gateway?
7. Which website are easy to card?
8. Which vpn are best?
9. Complete Carding process?
10. How to care google products?
11. Which problems are occurring during carding?
12. Which country using Vulnerable service?

## Demo

I can provide a Demo of Carding Process but it's Unethical Hacking, But i can show demo with my own Credit/Debit Card so it will not count as unethical hacking.

Note : I'm just going to Present all Important things about Carding and how to prevent carding attack.
